

PANELING APPLICATIONS

PANELING APPLICATIONS

Igneous Polyconcrete is also an excellent product to use aesthetically as a panel installation in all interiors, exteriors and for hard landscaping. We have done extensive work in wall and bench paneling for mixed use landscaping-walkway-seating areas and have now modified standard panels for this purpose. We can manufacture panels to fit most walled structures, to scale and purpose.

In addition, we also customize paneling for a range of uses - as tables tops, information desks, partitioning, overhangs, and decorative detail. We often incorporate branding or text, either embossed or debossed, as additional advertising or aid to the installation. Please contact us directly with your specification, ideas and installation purpose and we will assist with possibility and pricing.

MODIFIED ORGANIC BENCH

IGNF045

Material	Polyconcrete
Height	910mm (Excl wall)
Width	750mm
Length	1.5m
Weight	120kg
Available Variations	
Other Specifications/Notes	Seat height front 260mm, seat height towards back 225mm Detailed drawings can be supplied

ORACLE BENCH

IGNF047

Material	Polyconcrete
Height	280mm (Excl wall)
